Cervical Spine Anatomy and Neck Pain - Spine-Health The cervical spine (neck) is a well-engineered, strong structure that delicately houses the spinal cord and flexibly allows movement of the head in all directions. Cervical Spine Anatomy, Diagram & Function | Body Maps The cervical spine consists of seven vertebrae, which are the smallest and uppermost in location within the spinal column. Together, the vertebrae support the skull, move the spine, and protect. The Cervical Spine - Features - Joints - Ligaments ... The cervical spine is the most superior portion of the vertebral column, lying between the cranium and the thoracic vertebrae. It consists of seven distinct vertebrae, two of which are given unique names: The first cervical vertebrae (C1) is known as the atlas. The second cervical vertebrae (C2) is known as the axis.

Cervical Spine Anatomy (Neck) - Vertebrae and Cervical ... The cervical spine (sometimes abbreviated as c-spine in the medical world) begins at the base of the skull. Seven vertebrae make up the cervical spine with eight pairs of cervical nerves. The individual cervical vertebrae are abbreviated C1, C2, C3, C4, C5, C6, and C7. The cervical nerves are also abbreviated; they are C1 through C8. Cervical vertebrae - Wikipedia By convention, the cervical vertebrae are numbered, with the first one (C1) closest to the skull and higher numbered vertebrae (C2â€“C7) proceeding away from the skull and down the spine. Cervical Vertebrae - Anatomy Pictures and Information The cervical vertebrae of the spine consist of seven bony rings that reside in the neck between the base of the skull and the thoracic vertebrae in the trunk. Among the vertebrae of the spinal column, the cervical vertebrae are the thinnest and most delicate bones. Yet, in spite of their size, the.

Cervical Vertebrae - Physiopedia The cervical spine is made up of two anatomically and functionally different segments. These two segments work together to produce rotation, lateral flexion, flexion and extension of the head and neck. It is made up of 7 vertebrae. The first 2, C1 and C2, are highly specialized and are given. Cervical Spine Anatomy: Overview, Gross Anatomy The cervical spine is made up of 7 vertebrae. The first 2, C1 and C2, are highly specialized and are given unique names: atlas and axis, respectively. C3-C7 are more classic vertebrae, having a body, pedicles, laminae, spinous processes, and facet joints. C1 and C2 form a unique set of articulations. Cervical Spine â€“ Anatomy, Diseases and Treatments Learn about cervical spine anatomy, diseases and conditions which may affect the cervical spine and what treatments neurosurgeons can provide.
